

AGIP EUROSPORTS

AGIP EUROSPORTS is a fully synthetic lubricant, specifically formulated with an accurate selection of synthetic basestocks (PAOs) to satisfy the demand of the gasoline engines in the most severe driving conditions (high output engines, stop and go or highway service).

CHARACTERISTICS (TYPICAL FIGURES)

AGIP EUROSPORTS

SAE Grade		5W-50
Viscosity at 100°C	mm ² /s	19,0
Viscosity at 40°C	mm ² /s	100
Viscosity at -25°C	mPa.s	3300
Viscosity Index	-	210
Flash Point	°C	210
Pour Point	°C	-45
Mass density at 15°C	kg/l	0,875

PROPERTIES AND PERFORMANCE

- The synthetic component strengthens the oil film which adheres tenaciously to metal surfaces even when the engine has been standing for some time, thus ensuring easy starting and greatly reducing wear under high load conditions.
- The wide viscosity range 5W-50 ensures the proper viscosity of the oil in every part of the engine, at any driving condition, at any ambient temperature.
- Its antiwear properties ensure long life for all moving parts and substantially reduces the need for engine servicing and overhauls.
- The use of low volatility, thermally stable synthetic components minimizes oil consumption.

SPECIFICATIONS

AGIP EUROSPORTS 5W-50 complies with the requirements of the following specification:

API SL quality
